Digital Literacy Skills: Collaboration

Using Online Tools for Collaboration

Oide

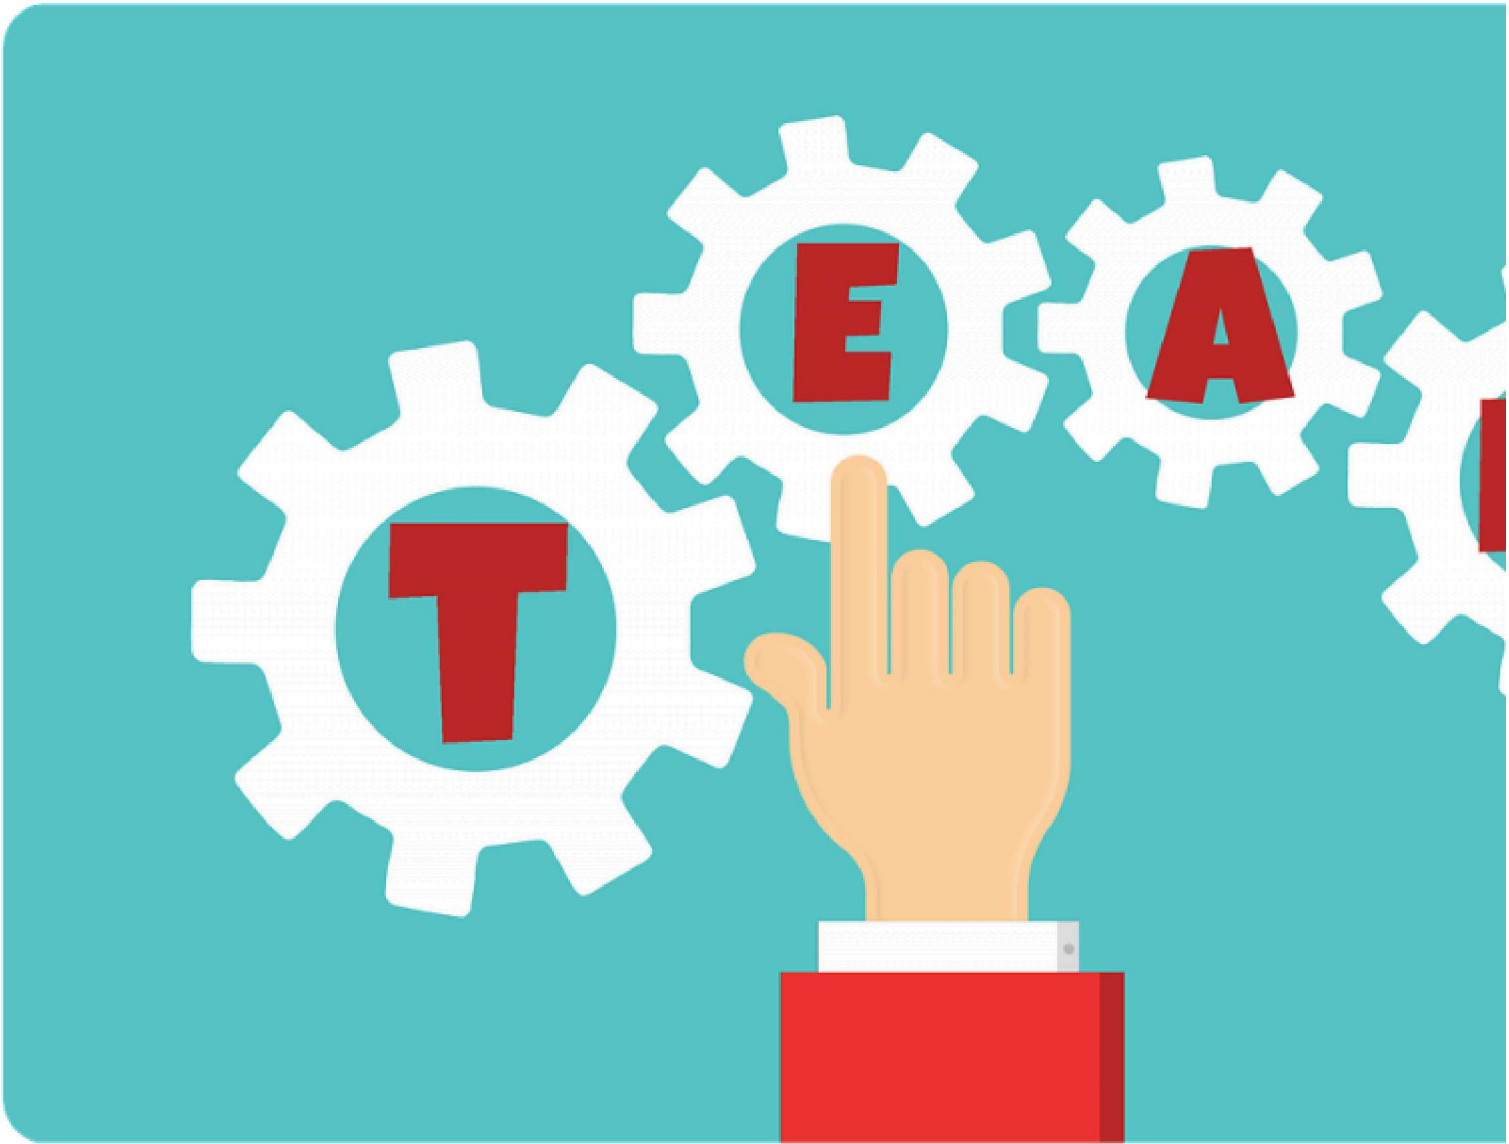

01:39

Technology is a key tool to promote and enhance collaboration skills. Learning to work with every student in the future. Technology makes collaboration and teamwork easy. There are a utilise collaboration as a main component of learning in class or at home. Jigsaw learning, coll projects are all some of the activities that can be done using technology. Here is a list of webs when doing project work: [here](#). they include: [Scoilnet](#), [Seomra Ranga](#), [National Geographic Kic](#)

Peer learning and collaboration can be created with your students using a variety of online m Classroom to collect and disseminate work, while presentations or a wikis are great to show e these allows users to edit and modify both content and structure collaboratively. By using tec extend the walls of the classroom and allow for different learning styles. Work can be complet On most online platforms, take [Wikispaces](#) as an example, the teacher is able to track what st schedule deadlines, and to monitor changes in real time. Just make sure you establish clear c allowed to say online before using starting your online project.

What Are the Benefits?

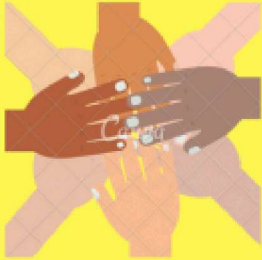

By using online collaboration tools your students are able to negotiate content between each visual elements to enhance the overall look and feel of their project/ presentation. It is a dem accept and amend their ideas and work, based on peer reviewing and feedback. Students are comment, reference and study using these enhanced learning tools.

According to Vygotsky's theory of [Zones of Proximal Development](#), more commonly known as together can create an environment where they work slightly above their own level. Therefore knowledgeable peers can increase both achievement and productivity.

Want to start a task-based project with your students using technology? Use our handy infographic

DIGITAL LITERACY SKILL: COLLABORATION

1. TEAMS

Assign teams and get them to think of a great team name. Assign each team their project in class, via the platform or through email.

2. DISCOVERY

Get your teams to work together on finding relevant information for their presentation or project online.

3. CREATE CONTENT

Work together to write your project in your own words. Add pictures and other visual elements to your work. Help each other and edit each others work.

4. COMMUNICATION

Make sure that everyone is happy with the work you have put together. Listen to each others opinions and take suggestions on board.

5. PRESENT FINDINGS

Present your project to your class, allow each team member to contribute. Thank your teammates and relax.
